GOLD ARCHIVE DISCS THE SCIENCE BIT

Our Gold Archive discs integrate a double reflective Gold and Silver layer to ensure the highest compatibility. The Gold layer offers maximum resistance to environmental deterioration, especially data corrosion which is one of the major causes of disc failure in standard media. The silver layer delivers high reflectivity and broad drive compatibility.

Speed 1-8x **Capacity** 4.7GB **Recording Time** 120min

- 24K Gold layered disc
- Archival Grade
- Premium OEM Japanese materials & technology
- Licensed Japanese media code
- Excellent compatibility
- High performance with low error rates

These Gold Archive discs have been intensely tested by the manufacturers in accelerated aging tests under severe storage conditions, such as high temperature and high humidity. The results confirm safe storage of information for more than 100 years.

Specification	Ver 2.1
Recording speed	1-8x
Storage capacity	4.7GB
Recording time	120Min Video SP mode
Layer	Single
Recording type	Write-Once
Recording layer	AZO / Organic Dye
Media Code	8x :MCC02RG20 / TTG02
Reflective layer/mask	Double layer Gold & Silver-alloy Std 26 - 118mm
Hard coat	Ultra HC - Optional
Estimated shelflife under office conditions	100 Years

Aging Test: Gold Archival DVD-R vs Std DVD-R at 80C / 80% RH
